PROFESSIONAL SUMMARY

Operations and administration professional with 5+ years of experience across industrial projects, warehouse operations, ERP-supported workflows, inventory, workforce coordination, logistics, travel services, and customer operations. Hands-on experience supervising teams, coordinating site functions, managing daily-wage attendance and entitlements, processing high-volume Odoo transactions, monitoring materials and fuel, supporting accommodation and catering operations, and improving workflows through KPI-based performance management and custom digital systems. Strong combination of operational execution, administration, data management, ERP capability, and technical problem solving.

EXPERIENCE

Warehouse Supervisor / Acting Warehouse Manager

Al Sharz General Trading Co. | Baghdad | March 2026 – April 2026

Supervised 8 employees, including 6 warehouse staff and 2 accountants, coordinating daily operational priorities.

Managed preparation and dispatch of more than 120 customer orders per day while maintaining workflow control and stock accuracy.

Managed inventory exceeding 1,000 items and monitored inbound, outbound, return, and sales-related stock movements.

Established clear KPI-based performance measures, improving work efficiency and order-preparation speed.

Introduced a pre-picking filtering and verification process that noticeably reduced preparation errors and daily returns.

Reduced returned orders to approximately 10–20 per day; returns were higher before the process improvements.

Conducted stock counts and inventory audits and followed up on inventory discrepancies.

Participated in recruitment and interviewing of warehouse personnel and trained new employees on warehouse procedures.

Coordinated attendance and payroll-related information and followed up on employee requirements.

Arranged employee meals, including lunch and dinner, improving operational support for warehouse personnel.

Administrative Assistant

Halabja Group Brick Factories – Ishtar Brick Factory Project | Wasit | August 2024 – February 2026

Processed more than 500 monthly purchase, material-in, and material-out requests through Odoo ERP.

Managed Odoo workflows covering purchase requests, warehouse material issuance and returns, inventory information, and analytics.

Coordinated material receiving operations averaging approximately 15 deliveries per month.

Recorded attendance and entitlements for more than 20 daily-wage workers and prepared daily reports and weekly summaries for Accounting.

Directly supervised 5 service employees and coordinated their daily operational requirements.

Coordinated across warehouse, engineering, catering, security, and external personnel teams to support site operations.

Received and monitored approximately 2,500+ liters of kerosene per month for 4 vehicles/machinery units and 2 generators, with consumption reporting.

Designed and developed a custom digital administrative system that reduced selected worker-pay and warehouse-request processes from hours to minutes.

Managed and coordinated more than 20 accommodation units within the project.

Organized meal planning and related schedules for more than 60 people at the project.

Conducted field inspections, documented observations, and reported operational matters to the Project Manager and Site Engineer.

Received construction materials, documented receipts, and supported material advances and logistics coordination.

Prepared official correspondence to government authorities and laboratories, followed up on test results, and delivered results to relevant departments.

Prepared safety commitment documentation for technical staff, employees, and newly hired workers.

Entered ready-mix concrete delivery receipts and company codes and maintained related project records.
